

An Information Services Technology Company

Capabilities Statement

MIS Sciences Corporation, (MIS) provides strategic consulting, messaging, technology, and FISMA High FedRAMP services to Federal and state government agencies. MIS can mobilize the right people, skills and services to help agencies meet their most demanding IT needs.

As a Woman Owned Small Business, MIS is committed to customer service and creating innovative and flexible solutions for State and Federal agencies.

What sets MIS apart from the competition?

- 21+ Years of Experience working with Government Agencies
- FedRAMP Dedicated Cloud and On Demand Cloud Services
- FISMA High certification for our FedRAMP environment
- Colo your equipment and leverage our FISMA High FedRAMP Environment
- Performance-Based Processes and Integrated Solutions Teams
- Client Relationship Management
- Strategic Mix of Technology and Business Solutions
- Our People – Our Service

Core Capabilities

- FedRAMP Services (IaaS, PaaS, DRaaS, MSaaS)
- DR and Business Continuity Services
- Managed, Dedicated, and Cloud Hosting Services
- Email and SMS Messaging Services
- Consulting Services
- Mobile App and Web Development (Technology Services)

Our FISMA High FedRAMP Services provide Government compliance using a JAB P-ATO in the MIS datacenters providing reserved and on-demand compute instances. Bring your own hardware or applications and leverage our JAB P-ATO to meet your certification needs. MIS also utilizes partnerships with AWS and Microsoft Azure for special application purposes.

Our DR and Business Continuity Services utilize redundant datacenters to provide cold, warm, and hot backup and BC capabilities utilizing regular backup or real-time replication. GEO load balancing is available to allow for 100% uptime and load distribution.

Our Managed and Dedicated Services provide full service and fully redundant managed, dedicated, and Cloud hosting environments to meet the most complex and demanding needs.

Our Messaging and Notification Services (eAlert) provide high-speed message delivery using email, SMS, and voice to targeted groups or entire cities. Designed for emergency and notification services, 2-way
